Plaintiffs, Mid-Town Laundry, LLC, and State-Albany Properties, LLC (hereinafter collectively referred to as “Plaintiffs”), by way of complaint against defendants, Rosalie Donato and John Does 1-10 (said names being fictitious operators) (collectively referred to as “Defendants”) says:

THE PARTIES

1. Plaintiffs, Mid-Town Laundry, LLC, and State-Albany Properties, LLC (hereinafter collectively referred to as “Plaintiffs”), are the current owners and operators of a coin-operated laundromat located at 1122-1124 State Street in Schenectady, New York (hereinafter referred to as the “Mid-Town Laundry Site”).

2. Defendant, Rosalie Donato was the former owner and operator of a dry cleaning business located at the Mid-Town Laundry Site that utilized and stored tetrachloroethane

(“PCE”), tricholoroethene (“TCE”), 1,2-dichloroethene (“DCE”) and other related chlorinated solvents on a daily basis at the Mid-Town Laundry Site from approximately 1969 to 1987.

3. Defendants, John Does 1 through 10 are fictitious operators of the site that is the subject of this action.

JURISDICTION AND VENUE

4. This Court has federal question jurisdiction over this Complaint pursuant to 28 U.S.C. §1331 and 42 U.S.C. §9607.

5. Venue is proper in this Court pursuant to 28 U.S.C. §1391(b) and 42 U.S.C. §9607 insofar as the claims asserted are alleged to have arisen in the Northern District of New York, and the alleged “release” of hazardous substances is claimed to have occurred at the Mid-Town Laundry Site located in this District in the City of Schenectady.

BACKGROUND AND NATURE OF THIS ACTION

The Contamination of the Mid-Town Laundry Site

6. Defendant, Rosalie Donato operated a dry cleaning business that utilized and stored PCE, TCE, DCE and other related chlorinated solvents on a daily basis at the Mid-Town Laundry Site from approximately 1969 to 1987.

7. A site investigation conducted and a report issued by the New York State Department of Environmental Conservation (hereinafter referred to as the “DEC”) confirmed the historical releases of PCE, TCE, DCE, and other chlorinated solvents into the soil and groundwater at the Mid-Town Laundry Site as a direct result of the Defendants’ prior dry cleaning operations.

8. On the basis of the site investigation and confirmation of PCE, TCE, DCE releases at the Mid-Town Laundry Site, Plaintiffs have been served with notice from the DEC that the Mid-Town Laundry Site constitutes an inactive hazardous waste disposal site.

9. Since the discovery of environmental contamination at the Mid-Town Laundry Site, Plaintiffs have been undertaking efforts to address the conditions identified by the DEC.

10. Plaintiffs never conducted any dry cleaning operations at the Mid-Town Laundry Site, and the DEC site investigation specifically identified the former dry cleaning business operated by Defendants as the area of environmental concern due to its historical usage of PCE, TCE and other related chlorinated solvents.

11. Within its analysis and report, the DEC also collected sampling data for the soil and groundwater at the Mid-Town Laundry Site. Groundwater concentrations for PCE, TCE and DCE at the Mid-Town Laundry Site were all determined to exceed New York State Groundwater Quality Standards, and the soil vapor sampling showed elevated levels of PCE and TCE.

12. A significant concentration of contaminants on the Mid-Town Laundry Site is the PCE in the soils and soil vapor in the area known as SS-01. The PCE contamination in the area known as SS-01 was due to an onsite discharge or discharges caused by Defendants' former dry cleaning operations at the Mid-Town Laundry Site. The total PCE contamination in the area of SS-0 is approximately 2,700,000 ug/m³.

13. As such, and based upon the vertical and horizontal delineation of the contamination plume, the DEC has confirmed that the presence of PCE, TCE, and other related chlorinated solvents in the soil and groundwater at the Mid-Town Laundry Site entirely relates to Defendants' prior dry-cleaning operations.

14. The releases of PCE, TCE, DCE, and other chlorinated solvents at the Mid-Town Laundry Site not only predate Plaintiffs' operation of a coin-operated laundromat, but relate entirely to Defendants' former dry cleaning operations.

15. In fact, the releases and discharges of PCE, TCE, and DCE occurred prior to the transfer of the Mid-Town Laundry Site and was specifically identified and disclosed within the DEC site investigation.

16. The CVOs that were discharged and/or released from the Defendants' prior dry cleaning operations have adversely affected the Mid-Town Laundry Site. Spills and discharges of hazardous substances disposed of by Defendants have resulted in contamination of the soil, groundwater and soil vapors on the Mid-Town Laundry Site.

17. Plaintiffs have expended costs in investigating and remediating the soil, groundwater, and soil vapor contamination at the Mid-Town Laundry Site caused by Defendants' discharges of chlorinated solvents and other hazardous substances from their prior dry cleaning operations.

18. As a direct result of dry cleaning activities and operations at the Mid-Town Laundry Site by the Defendants, Plaintiffs have incurred and will continue to incur expenses and costs associated with the investigation and remediation of contaminated soils, groundwater, and soil vapors at the Site.

21.
